WEARING A MASK AT AFM

Updated: August 17, 2020

In order to comply with the Colorado state mask mandate, AFM requires that all patients and visitors wear a solid-barrier mask or face covering that covers the nose and mouth and fits securely under the chin. You must keep your mask or face covering on during the entire visit, even when you are alone in a room.

AFM will no longer allow the following face coverings in our offices, as they are not highly effective in limiting or preventing the transmission of respiratory droplets:

- Bandanas
- Neck gaiters
- Vented masks
- Any mask made out of open-weave or fleece material

For more information, visit the [CDC's guidelines](#) on how to select, wear, and clean your mask.
